Agenda

- About SDSU
- Computational Science Research Center (CSRC)
- Basic Skills set
- Curriculum Core Areas
- Multi-disciplinary/Interdisciplinary Training
- PhD Program in Numbers
- Summary
About SDSU

- San Diego State University: (34K+ students), 1 of 23 campuses in the California State University system, founded in 1897
- Designated a Doctoral/Research Intensive University by the Carnegie Foundation
- Since 2000, SDSU faculty and staff have attracted more than $1 billion in grants and contracts for research and program administration.
- 6,253 current masters and doctoral students
Computational Science Research Center (CSRC)

- Established in 1999 to address growing need for interdisciplinary and computational research.
- Interdisciplinary mechanism for the Computational Science & Engineering Graduate programs
- First Computational Science PhD program in California
- The CSRC represents a consortium of key faculty from Engineering and Science Colleges, with access to faculty throughout the campus
In addition to the many SDSU faculty and administrators contributing on various levels and capacities to the CSRC effort, we have 58 research affiliated faculty from industry, the national labs and other universities that support our goals.
Degree Programs

- Advanced Certificate in Computational Science (ON LINE)
- Master of Science Program
- Master of Science with a Concentration in Professional Studies
- PhD Program in Computational Science
- PhD in Computational Science/Statistics
Areas of Research

- Fluid Dynamics
- Materials Science
- Biophysics
- Nonlinear Dynamics
- Environmental Science
- Scientific Databases & Data Mining
- Bioinformatics
- Computational Algebra
- Nuclear Physics
- Astrophysics
- Scientific Visualization
- Image Processing
- Structural Mechanics
- ... and more
The Numbers

Ph.D.
- # of students: 41
  - Female: 16
  - Male: 25
- # graduated: 13
- # graduating this year: 9

Master of Science
- # of students: 10
  - Female: 4
  - Male: 6
- # graduated: 19

Professional Master of Science
- # of students: 20
  - Female: 4
  - Male: 16

Number of scientific publications by students: 87
Basic Skills Set

- Team Projects
- Interdisciplinary
- Scientific Computing
- Software
- Planning
- Communications
Curriculum Core Areas

- Numerical Analysis
- Mathematical Modeling
- Statistics
- Scientific Visualization
- High Performance Computing
- Scientific Data Base Techniques
Multi-disciplinary/Interdisciplinary Training

- Discovery Teams
  Science Driven
  Faculty/Postdocs/PhD/MS/BS

Comp 670 Problems in Computational Science
Industry Interaction

- ACSESS
- Curriculum Forum
- Poster Session
ACSESS

- Applied Computational Science & Engineering Student Support
  - Collaboration between Industry and Academia
  - Benefits for Industry
    - Qualified & trained student employee
    - Specialized faculty mentor and advisors
    - Utilization of CSRC resources
    - Joint grant submissions
  - Benefits for CSRC & Students
    - Real-world experience
    - Education funding
Summary

We are training the next generation of Computational Scientist of the 21st Century and we need your help providing real world problems for our students.
