## New Master's Degree Program

# **M.S. COMPUTATIONAL SCIENCE (DATA SCIENCE EMPHASIS)**

Computational Science Research Center (CSRC) at San Diego State University is well recognized for its interdisciplinary computational science MS and PhD degree programs.

This new Master's Degree Program in Computational Science with Data Science emphasis adds to that list and will focus on preparing graduates from science and engineering for computational problem solving in applied science and engineering with expertise and skills to tackle modern big data challenges.

The curriculum includes course work in data analytics, statistics, high performance computing, numerical methods, and projects that train students in solving practical industrial problems.

Applicants with strong backgrounds in mathematics, physical, biological and geological sciences, computer science, and engineering are encouraged to apply.
